Enabling JavaScript within Internet Browsers

Last Modified on 08/15/2022 6:11 pm EDT

This page will guide you through the steps of how to enable JavaScript within your internet browser. Most of Norton's digital products require JavaScript to be enabled to function properly. Click on the link below that matches the operating system and internet browser you are using to view customized instructions on how to enable JavaScript.

Hide All Answers

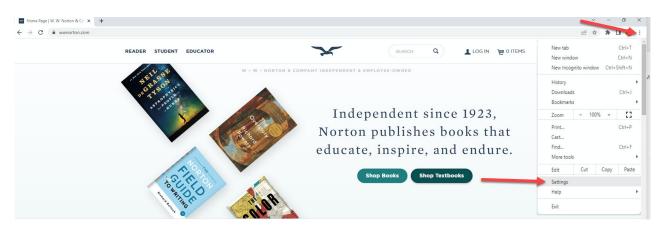

DON'T KNOW WHICH INTERNET BROWSER YOU'RE USING? CLICK HERE.

Windows/Microsoft Edge

JavaScript is enabled by default in the Microsoft Edge browser when using Windows.

Windows/Chrome

Click on the menu icon in the upper-right corner of the window and select Settings from the menu.

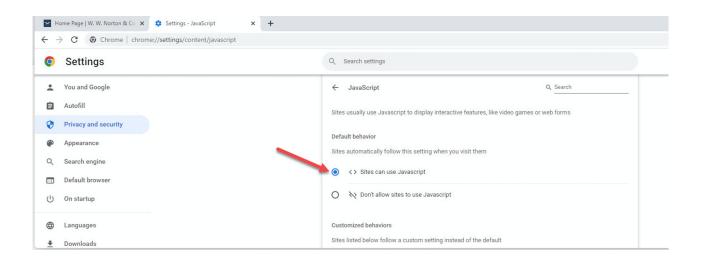

Select Privacy and Security and then select Site Settings
